'Fulfilling Potential, Rewarding Success'

It has been another busy week and I am pleased to see the great amount and quality of work that has already been produced. Well done to all of the children who represented us at the cross country!

At lunchtimes, the children have been trying to use their best manners to earn stickers as a table. Each table has a mentor and those who earn the most stickers each fortnight will win a golden ticket. At the end of the year, golden tickets will be drawn and those children will win a meal out paid for by the school.

The school website is still being updated which is a very lengthy process. If there is anything you need to know and cannot find then please let us know and we will happily provide this.

Our new attendance game is going down well and Diamonds have been very lucky winning biscuit decorating, a class game and dojos! Rubies have also won some I-pad time. Hopefully, Sapphires will be able to get onto the board on Friday.

The school has changed its twitter account so please follow us @Swinefleet_Pr

Rubies (Reception and Year 1)

The Rubies have been learning about animals and looking at where they live. Today they have been designing homes for them and writing why they would make a good home. The year 1 children have been learning about pairs and I was impressed to see them all chanting in twos.

Rubies (Nursery)

The Nursery Rubies have been learning about Peppa Pig and the story of The Three Little Pigs. They had great fun building houses out of different materials. I was able to watch some of their sessions yesterday in which they were learning a new song about firemen and counting one less each time. The children have decided to look at Paw Patrol this week and they were keen to tell me about all of the characters.

Diamonds

Diamonds have been continuing their learning about the Ancient Egyptians including learning to write in hieroglyphics. The children enjoyed showing me what they have learnt and were able to write their name and a short sentence. Miss Parkin has been introducing the class to golf which looked great fun. I wonder if any of them will be professionals one day?

Sapphires

Sapphires have been learning about the structure of our teeth through investigating how different liquids damage them. Their investigation involved eggs and many liquids including some milk which after a couple of days smelt beautiful! Ask them what they found out as many were shocked at the result. They have now begun to look at what happens in the digestive system when we swallow.

Sapphire
Science

Remember

Remember that children need P.E kit in school at all times.

The Harvest Festival will take place at 2:15 on the 10th Oct.

Attendance

93%

Needs Improvement

Well done to Diamonds and Rubies who got a roll on our attendance game.

House Teams

This week Snowdon and Scarfell Pike achieved the most Swinefleet tokens.

Well done!
